

Caribou Ecology & Recovery

Webinar Series

Join us to explore the latest research supporting caribou ecology and recovery in Canada—from the mechanisms of caribou declines to potential recovery options. The series begins with a Western Canadian focus; webinars will be added to include a national and international scope.

Date	Time	Presenter	Presentation Title
12-May 2020	02:00PM MDT	Craig DeMars	Demographic responses of threatened woodland caribou to annual variation in meteorological and phenological conditions
26-May 2020	09:00AM MDT	Mykra-Pohja Sakari & Milla Niemi	Finland wild reindeer reintroduction program
2-Jun 2020	02:00PM MDT	Allicia Kelly	Seasonal patterns of mortality for boreal caribou in the southern Northwest Territories
16-Jun 2020	02:00PM MDT	Melanie Dickie	Recovery actions for woodland caribou: Predicting and testing the efficacy of habitat restoration
